## PROFESSIONAL SUMMARY

---

Senior Software Engineer at Persistent Systems with a robust two-year experience in automation frameworks and backend application development using Spring Boot. Proficient in a range of frameworks, including Spring, Spring Boot, Spring MVC, and Spring JPA, with additional expertise in Hibernate. Demonstrated competence in Git version control and GitHub collaboration, adept in bug reporting through JIRA.

## WORK EXPERIENCE

---

**Software Engineer - Persistent Systems** (Hyderabad, Telangana)

**Jan 2022 - Present**

### Sarvatra (eHUB Product) :

- My primary expertise lies in the utilization of Java to make meaningful contributions within the Business Automation Domain.
- Sarvatra ehub is a leading end-to-end payment solution provider offering Rupay Debit cards, ATM, IMPS, PPI, AEPS, and BBPS products. it builds payment solutions on the NPCI platform.
- Expertise in the Software Testing field including Functional, Regression, Integration, and System testing.
- I have worked on a PPI Product; that is similar to bank debit cards. With a PPI card, we can load amounts to particular and can be used for general purposes.

## PROJECTS

---

### eCommerce Application:

- Developed an Application using Spring Boot consisting of various modules i.e. Cart Service, Category Service, Customer User Details, Order Service, Product Service, and User Service.
- Expertise in Spring Security using JWT, Spring MVC, Spring JPA, Junit and API Documentation using Swagger.
